

DESCRIPTION

Teledyne Paradise Datacom's High Power Outdoor (W) series SSPAs represent the latest in High Power Microwave Amplifier Technology. The SSPA package achieves the highest power density in the industry along with enhanced maintainability.

All subassemblies are accessible and replaceable in the field. Local, front panel, control is available with a user friendly interface. A full compliment of serial and parallel (contact closure) control is also available via circular connectors.

A state of the art thermal platform provides efficient cooling for the amplifier module and power supplies. This ensures the highest possible MTBFs for microwave power amplifiers.

Along with high reliability comes the ultimate in amplifier maintainability. Amplifier modules and power supplies are easily accessed and removed, making this one of the easiest amplifier assemblies to maintain in the field.

L-Band Operation

Teledyne Paradise Datacom amplifiers are available with an integrated L-Band Block Up Converter. L-Band units utilize Teledyne Paradise Datacom's proprietary zBUC technology. The addition of a zBUC[®] converter to the SSPA typically increases the gain by 2-4 dB. The advantages of zBUC technology include:

- zBUC converter can detect and switch to an externally supplied reference.
- Optional internal high stability (10MHz) reference.
- zBUC converter can lock to an externally supplied reference of 10 or 50 MHz.
- zBUC converter can accept a wide range of external reference power (-10 to +5 dBm).
